

NEXT GENERATION OF PERFORMANCE PLASTIC – ANTIMICROBIAL ACRYLIC & POLYCARBONATE SHEET

TRANSPARENT SHEET FORMULATED WITH A SILVER ION ANTIMICROBIAL AGENT THAT PROTECTS THE SURFACE FROM MICROORGANISM GROWTH

Safety Shields can help prevent the spread of airborne illnesses by creating a physical barrier between people, but they also present a surface for microorganisms to grow. Silver ion antimicrobial technology protects AMGARD surfaces from degradation by preventing the spread and growth of microorganisms. The technology is built into AMGARD during the manufacturing process and remains active for the life of the product.

Certified laboratories have independently tested AMGARD to ISO 22196 “Measurement of Antimicrobial Activity on Plastics / Non-Porous Surfaces” – the industry standard for measuring Antimicrobial activity on Plastics and confirmed a reduction in the growth of microorganisms on the sheet surface.

AMGARD is available in OPTIX® Acrylic and TUFFAK® Polycarbonate sheet options to meet a range of applications

- » Protects surface against the growth of microorganisms such as bacteria, mold and mildew that cause stains and odors
- » Provides additional surface protection between cleanings
- » Complies with applicable EPA requirements as a Treated Article
- » Stocked in 48”x 96” sheet of 0.220” thickness
- » Tested to ISO 22196 “Measurement of Antimicrobial Activity on Plastics / Non - Porous Surfaces”

Representative 24-hour antimicrobial effect. AMGARD is formulated with silver ion antimicrobial technology to protect the sheet’s surface. It is not designed to prevent the transmission of any disease or infectious agent.

Product Comparison

	Glass	Regular Sheet	AMGARD Sheet
Prevents Microbe Growth	No	No	Yes
Shatter Resistant	No	Yes	Yes
Lightweight	No	Yes	Yes

DISINFECTING ACRYLIC AND POLYCARBONATE

When disinfecting AMGARD Safety Shields, proper procedures should be taken. To minimize the risk of damage, use only compatible household cleaners as outlined below.

For more details please contact the Plaskolite Technical Service Group at **800.848.9124** with any questions.

Disinfectants for Plaskolite Products

Product/Brand	Manufacturer	Products	Compatibility**
AMGARD Polycarbonate	sBioMed, LLC	Steriplex SD	Compatible
AMGARD Polycarbonate	Safetec of America	Safetec surface wipes	Compatible
AMGARD Polycarbonate	CONTEC Healthcare	Peridox RTU	Compatible
AMGARD Polycarbonate	CONTEC Healthcare	Prosat sterile wipes PS-911EB	Compatible
AMGARD Polycarbonate	Generic	Hydrogen peroxide 3%-5%	Compatible
AMGARD Polycarbonate	Generic	Isopropyl alcohol 70%	Compatible
AMGARD Polycarbonate	Generic	Warm dish washing soap solution	Compatible
AMGARD Acrylic	Generic	Hydrogen peroxide 3%-5%	Compatible
AMGARD Acrylic	Generic	Bleach - household laundry grade	Compatible
AMGARD Acrylic	Generic	Quaternary ammonium compounds @ use dilution	Compatible
AMGARD Acrylic	Generic	Isopropyl alcohol - diluted with water to 30% strength	Compatible
AMGARD Acrylic	Generic	Warm dish washing soap solution	Compatible
AMGARD Polycarbonate	The Clorox Company	Clorox® health care bleach germicidal cleaner	Not Compatible
AMGARD Polycarbonate	Unimed Corp	Accel TB	Not Compatible
AMGARD Polycarbonate	The Clorox Company	Clorox® broad spectrum quaternary disinfectant cleaner	Not Compatible
AMGARD Polycarbonate	Zep Inc	ZEP 40	Not Compatible
AMGARD Polycarbonate	Zep Inc	ZEP Spirit II	Not Compatible
AMGARD Polycarbonate	PDI Inc	PDI Super Sani-Cloth	Not Compatible
AMGARD Polycarbonate	Reckitt Benckiser	Lysol disinfectant spray brand III original	Not Compatible
AMGARD Polycarbonate	Fiberlock Technologies Inc	Shockwave disinfectant	Not Compatible
AMGARD Polycarbonate	CONTEC Healthcare	Preempt RTU multi-surface disinfectant cleaner	Not Compatible
AMGARD Polycarbonate	The Clorox Company	Clorox® household bleach - all dilutions	Not Compatible
AMGARD Acrylic	Generic	Ethyl alcohol - pharmacy grade	Not Compatible

SPECIAL NOTES: Cleaning products were tested on flat uncoated AMGARD Polycarbonate and AMGARD Acrylic sheet products. Do not use incompatible cleaners or disinfectants on sheet products. Generally speaking, soap and water or hydrogen peroxide disinfectants work best on these products.

**Because manufacturers sometimes change their formulas without notification compatibility in perpetuity can not be presumed.
